Dear Dr. Daniel,

THANKS for your initiative and e-mail. I visited www.pcbinschool.org and found it very interesting ... you have pointed out/identified an area of most concerned, of which at least I (despite my involvement with PCBs issue) was absolutely unaware. THANKS again.

I would certainly forward your e-mail to our IPEN/PCBs dioxins group and you are most warmly invited if you like to join us to share information and ideas for action. Please visit www.ipen.org or <http://english.arnika.org> and www.sdpi.org for more details.

Best wishes

Mahmood
